

Match your Application to the Disk

Predator is a premium blend of proprietary Zirconia and Ceramic coated abrasives resulting in cost savings through a faster cut rate and material removal on all metals* as well as cooler grinding for longer disc life and heat build up in the material.

*See Chart on Back

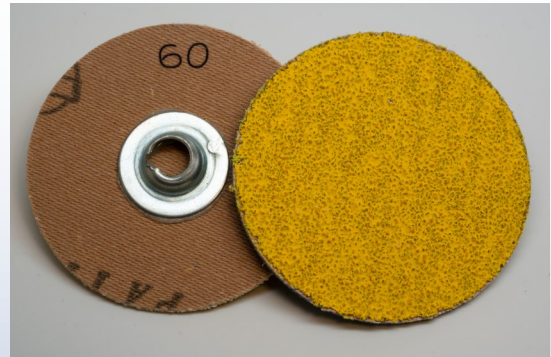

STIFF BACK

QUICK—LOK DISCS

Stiff Back will hold its shape for deburring & flash removal on edges and metal surfaces.

FLEX BACK

QUICK—LOK DISCS

Flex Back will bend and flex in corners and curves, preventing edge marks, gouging and increasing disc life on uneven surfaces.

We stock 2" & 3" Discs in 36, 60, 80 & 120 Grits
