

FILTERMIST MIST COLLECTORS

Don't let increased mist and smoke keep you from pushing your machine tools to their limits.

Sizing Units

The Royal Filtermist is available in four sizes, 300, 575, 900, and 1,200 cfm.

If you are not sure which unit to use, please contact us for your specific sizing requirements.

**LOW-COST, HIGHLY EFFICIENT,
AND MINIMAL MAINTENANCE!**

REDUCE ENERGY AND HEATING COSTS BY RECYCLING CLEAN AIR BACK INTO THE FACTORY

OIL MIST is hazardous to your health, causes slippery floors and damage to circuitries, can lead to coating of ventilation pipes, a potential fire risk, and coats light fixtures, reducing shop illumination over time.

FILTERMIST

ROYAL
PRODUCTS
Optimize everything.

GET RID OF THE MIST & SMOKE

Designed Specifically to collect oil mist and smoke produced by machinery, the Royal Filtermist simply does the best job, over a longer period of time, for the lowest cost.

For over 40 years, the Royal Filtermist has been effectively collecting mist and smoke generated by all types of machinery.

- Oil mist is removed at source
- Clean oil is returned to machine
- Clean air is returned to workplace

WHY CONTROL OIL MIST & SMOKE IN YOUR SHOP?

Reduced Health Risks

Any form of pollution is potentially dangerous to the lungs, larynx, and skin.

Reduced Accident Risks

Oil mist creates slippery surfaces which increase accident rates.

Reduced Fire Hazards

Oil deposits create a serious fire risk by allowing fires to spread quickly.

Coolant Cost Savings

Recycles coolant and returns it to your machine rather than venting it outside.

Heating and Cooling Cost Savings

Returns clean air to your shop instead of exhausting it outside.

Cleaning and Maintenance Cost Savings

Uncontrolled airborne mist and smoke deposits result in more cleaning of surfaces.

Adding a standard after filter increases system efficiency.

The drum pads slow down the airflow and should be periodically inspected.
